Color In Your Spring Garden

SPRING-FLOWERING bulbs are just about the most satisfactory things that you can plant. They give you plenty of cheerful color outdoors just at the time when you think you cannot bear another dull, gloomy day, and they require no care in the way of weeding, dusting and spraying. The forethought necessary to see that they get planted in the fall is all that is needed. After their glorious burst of bloom is over, spring bulbs then gracefully retire from the picture, yielding their space to the annuals that you may choose to replace them, or to the perennials and shrubs that need more time to come into full growth and bloom.

This catalogue offers plenty of variety in the way of Tulips and Narcissus, with the charming miniature bulbs to be planted in great drifts. As a foretaste of spring, we also offer many very fine bulbs for indoor growing. Thus it is possible to enjoy spring bulbs for several months of the year.

Daffodils and Crocus may be planted outdoors between September and mid-October, Tulips in late October, and Hyacinths from September to December. Be sure to plant the bulbs at a uniform depth. The easiest way to do this is to remove all soil from the bed to the depth required, set the bulbs, then carefully replace the soil. In using a trowel or dibble for the job, great care should be taken to see that the base of the bulb is pressed firmly into the soil.

After the ground is frozen to a depth of 4 to 5 inches, put on a cover of straw or leaves and do not remove it until early spring. Tulips and Hyacinths should be taken up each spring after blooming but Daffodils may be left in the ground for three or four years at a time. In any case, the foliage should be allowed to mature, either where they have flowered or after the bulbs have been taken up. Crocuses should not be planted where grass is kept clipped. To obtain best effects with them and other small-flowering bulbs it is essential to use them in large quantities.

Lilies demand good drainage. This may be secured by placing a quantity of sand below each bulb or by mixing peat or humus with the soil. Tall varieties should be planted where they receive protection from high winds; all enjoy partial shade.

This catalogue is offered subject to being unsold upon receipt of order.

TERMS. Prices quoted are net. We prepay transportation for cash with order.

SUBSTITUTES. Should the stock of any variety ordered be exhausted, we shall, to save delay, send in its place the most suitable substitute, unless instructed to the contrary.

NON-WARRANTY. We give no warranty, express or implied, as to the productiveness of any bulbs we sell and we will not be in any way responsible for the crop.

EARLY ORDERING. Your cooperation is invited. Placing orders early will facilitate delivery at the proper time.

HUNT'S RECOMMEND

Our general list contains the best and the finest current varieties of bulbs to plant in the fall of 1948. To those "seasoned" horticulturists who "know the book," who have enjoyed all the currently popular kinds in past years, who wish to look at the newer introductions, the following list is offered. It is gleaned from the special notes of breeders and growers in many lands. Many of them have been grown and examined in our 1948 trial plantings. All these newcomers are sure to please you greatly.

For Daffodils, you may try:

Aeolus
Beersheba
Gracieuse
John Farquhar

Mrs. E. H. Krelage
Mrs. R. O. Backhouse
Robert Sydenham
Van Waveren's Giant

Collection: 12 Bulbs of each for \$35.00

Among the Tulips you will enjoy:

Golden Age
Kathleen Parlow
Red Champion

Early Bulbs for Greenhouse Culture

Lilies for Forcing

Easter, April 17, 1949

Mother's Day, May 8, 1949

The finest varieties of Lilies, admirably adapted for spring forcing, and specially desirable to have in pots for Easter and earlier.

Creole. (Louisiana-grown Giganteum.) Long white trumpet Doz. 100
\$16 00 \$115 00

Croft. Rapidly becoming the most popular Easter Lily. Should be planted by November 15 and requires about 130 days to bloom after four weeks in storage at 35 to 45° Fahr. The longer they remain in storage, the shorter is the time required to flower. Allow plenty of space in the greenhouse and apply liquid manure two or three times. Height 3 to 4 feet. 9-10 in. 19 00 150 00

Estate. Similar to the Croft Lily but grows 4 to 6 feet tall and flowers about two weeks later under the same conditions. Very desirable also for outdoor culture. 9-10 in. 19 00 150 00

Harrisi. The Bermuda Easter Lily. Mammoth Bulbs, XXX, 11-13 in. 18 00 130 00
Large Bulbs, XX, 9-11 in. 14 00 100 00

Howardi. (Bermuda-grown.) Pure white trumpets. 9-11 in. 15 00 110 00

Peerless. This is a type resembling the Harrisi and has all its good qualities. It is, however, longer and larger in the trumpet. Large Bulbs, XXX 22 00 160 00

Candidum. Madonna Lily. The bulbs we offer are the true, hardy, French grown. They should be planted in September, in groups of from 3 to 6 dotted among the taller-growing perennials. They make their leaf-growth in October, then die down and bloom late the following June—stately spikes of large, white, fragrant flowers with yellow anthers. Specially Selected Top-sized Bulbs, XXX 14 00 90 00
Mammoth Bulbs, XX 10 00 70 00

Calla Lilies

Aethiopica. White Calla. Doz. 100
Mammoth Bulbs, XXX \$10 00 \$70 00
Selected Bulbs, XX 7 50 55 00

Baby White. This White Calla is a perfect miniature of the larger Aethiopica. Blooms freely, on stems 12 to 18 inches long 7 00 50 00

Elliottiana. Golden yellow. Top-sized Bulbs, XXX 10 00 70 00
Selected Bulbs, XX 7 00 50 00

Godfrey. Medium-sized white Calla. Very free flowering 7 00 50 00

Pentlandi. Large yellow Calla with dark throat \$3.50 each 35 00

Pink (Rehmanni Superba). Very free flowering. Makes an elegant pot plant and is good for cutting 10 00 75 00

Early Roman Hyacinths

French-grown

New-crop bulbs will be ready in September, when they may be planted in pots or pans of a compost containing two-thirds fibrous loam and one-third sand. Bulbs planted under glass in September bloom in December.

White. Extra large Doz. 100
\$4 50 \$30 00

Blue. 3 00 22 00

Pink. 3 00 22 00

Rosalie. A pink Roman from Holland. Splendid for Christmas flowering and earlier 4 50 30 00

Giant Sweet-Scented Freesias

King of the Yellows. Pat. 488. Extra large; yellow.

Maryon. Pat. 32. Fine extra-large mauve flowers.

Snowstorm. Pat. 487. Giant new white variety.

Any of above, \$16.00 per 100

Polyanthus Narcissus

Paper-White. Kept a few weeks in the dark after setting, to develop root-action, then brought to a light, airy room, temperature about 60 degrees, the white, fragrant trusses will open in about six to seven weeks.

Mammoth Bulbs, XXX Doz. 100
\$2 00 \$12 50

Soleil d'Or. Pale yellow perianth; orange cup. Mammoth Bulbs, XXX 2 25 15 00

Chinese Sacred Lilies. Splendid in pots, bowls, soil or water with pebbles 2 50 17 50

All Bulbs sent prepaid to any address for cash with order

Pre-cooled Bulbs

The bulbs are dug as usual, cured for two to three weeks, graded and then placed in a temperature of 50° Fahr. from six to eight weeks. Storage at this temperature makes normally late-flowering varieties *early* and early sorts *much earlier* and *easier to force*; in fact, they require only six to eight weeks from planting to full bloom. Pre-cooled bulbs should be potted promptly on receipt and kept in a cool place for proper root-action. On or about November 25, sample pots or flats should be removed to greenhouse or frames to see if they are ready to grow buds and foliage.

Pre-cooled Narcissus (Oregon-grown)

Cheerfulness. Handsome variety, late double white with creamy cup. 100
\$16 00

King Alfred. Golden yellow perianth and trumpet 25 00

Mrs. E. H. Krelage. Pure white perianth with light yellow trumpet 26 00

Twink. Double; pale primrose-yellow, center bright orange 22 00

Van Waveren's Giant. Primrose perianth; bright yellow trumpet 24 00

Pre-cooled Iris Bulbs (Oregon-grown)

Imperator. Early. Large brilliant blue flowers 100
\$14 00

Wedgwood. Large; blue 16 00

White Excelsior. Large; milk-white; very fine 11 00

Yellow Queen. The best yellow yet 12 00

Pre-cooled Tulips

Washington State-grown

Albino. Ivory-white flowers.

Princess Elizabeth. Lilac-rose edged rose, white base. Splendid for forcing.

William Copland. Beautiful lavender with white base. Fine for forcing.

Golden Harvest. (May flowering.) 30 in. Soft yellow, large flower on thick stem.

William Pitt. Scarlet. 28 in. A great improvement on the old variety. Splendid forcer.

Any of above five varieties, \$16.00 per 100; \$150.00 per 1000

Giant Darwin Tulips

SELECTED TOP-SIZED
BULBS ONLY

THE CREAM OF THE BEST DUTCH-GROWN VARIETIES

Darwin Tulips are increasing in popularity every season. Colors range from white to purplish black, including shades of crimson, violet, brown, rose, etc. Very effective for planting in shrubbery or in hardy plant borders. The flowers are large, deeply cupped, and are borne on lofty stems which are ideal for cutting and vase use. Gorgeous combinations of color can be made by planting them in broad masses or long, narrow borders. To avoid striking contrasts, use tones of bronze and pale violet with the lavenders—and soft pinks and lavenders, shades which merge

into each other and do not clash as violently as the usual red and yellow. If striking effects are desired, try *Bleu Aimable* in front of *City of Haarlem*, a vivid, odd, *French* combination of blue and scarlet; or an even more effective combination of some pale yellow, like *Belle Jaune* (*Cottage Tulip*), with a deep red-purple variety, *La Tulipe Noire*. The new pale yellows are also good with dark red varieties. Brilliant reds like *Eclipse* and *William Pitt* are best used alone, or against an evergreen background. Dark pinks are good with light pinks and white varieties.

Fragrant Hyacinths

Sent prepaid to any address for cash with order

Hyacinths may be put to several uses: They may be grown in beds and borders, forced in pots or pans, or grown in water, and are very easy of cultivation. We recommend small-sized bulbs for naturalizing.

Dutch Hyacinth

SINGLE BLUE

Bismarck. Sky-blue; very large spike. Excellent for forcing.
Grand Maitre. Lavender-blue; large and compact truss.
King of the Blues. Compact truss of dark blue bells. Late.
Myosotis. Forget-me-not-blue. Very large spike and bells.
Queen of the Blues. Pale azure-blue; large spike.
Schotel. Light blue; long, perfect spike. Good forcer.

SINGLE YELLOW

City of Haarlem. Pure yellow; large truss.
Yellow Hammer. Early pure yellow. Splendid for pots and bowls.

SINGLE WHITE

Arentine Arendsen. Pure white. Extra early.
L'Innocence. Pure white. The best white for all purposes.
La Grandesse. Pure white; fine bells. A beautiful flower.

SINGLE RED AND ROSE

Gertrude. Rosy pink; large, compact truss.
Lady Derby. Rose-pink; large spike. Excellent for pots.
La Victoire. Deep carmine-rose; very fine spike.
Royal Scarlet (Van Tubergen's Scarlet). Glowing scarlet.

Hardy Garden Lilies

FOR FALL PLANTING

All Lilies do not like the same conditions. The one universal requirement is absolutely perfect drainage. The loose, scaly bulbs which Lilies produce are susceptible to rot in wet soil, and it will pay to go to some pains to be sure that the ground for them

is properly drained. When Lilies are well established in the garden, it is well to feed them with a top-dressing of manure after the tops have died down in the autumn. It is better to omit manure from the Lily-bed before planting.

Regale. 3 to 5 ft. The finest and most easily grown Lily, producing large, flared trumpets suffused with gold and yellow on the inside and slightly stained with purple on the backs of the outer petals. The stem is stout and very wiry, so that the plant takes up very little room after flowering. Blooms immediately after the Madonna Lily and is one of the finest plants to be found in gardens.

	Doz.	100
Giant Bulbs, XXXX, 12-14 in.	\$13 00	\$90 00
Selected Bulbs, XXX, 11-12 in.	9 00	65 00

Selected Bulbs, X, 8-9 in.	6 00	40 00

Candidum. Madonna Lily. The bulbs we offer are the true, hardy, French grown. They should be planted in September, in groups of from 3 to 6 dotted among the taller-growing perennials. They make their leaf-growth in October, then die down and bloom late the following June—stately spikes of large, white, fragrant flowers with yellow anthers. Specially Selected.

Top-sized Bulbs, XXX	14 00	90 00
Mammoth Bulbs, XX	10 00	70 00

Testaceum (*L. excelsum*). Nankeen Lily. Orange anthers; drooping flowers. Plant shallow in autumn. Very attractive. Bulbs scarce Each \$2 50 25 00

Tenuifolium. Coral Lily. Drooping, rich scarlet flowers. 3 50 25 00

Tigrinum splendens. Single. Tiger Lily. 3 to 4 ft. Well known by its brilliant orange flowers spotted with maroon and black 5 50 40 00

Tigrinum flore-pleno. Double-flowering Tiger Lily. 5 50 40 00

All Bulbs sent prepaid to any address for cash with order

Lilium auratum

Auratum. The Golden-banded Lily. Genuine Japanese-grown. One of the stateliest of all the hardy Lilies; grows 3 to 6 feet high and bears twenty or more large and fragrant flowers 8 to 10 inches in diameter. Flowers white, spotted deep red, with bright yellow band running through the center of each petal, in August.

Strawberry Plants

POPULAR JUNE-BEARING VARIETIES

ALL POT-GROWN

Strawberry plants should be set out in rows 2 feet apart and the plants a foot apart. The varieties we offer are all perfect flowering and therefore need no association with any other variety for perfect fruiting.

Shipping season lasts from July until October. We recommend early planting to enable the plants to get established before the advent of winter.

Preparation of Soil. The bed for your plants should be dug and thoroughly cultivated to a depth of 12 to 14 inches. Incorporate with the soil, rotted leaves or well-rotted manure of any kind (fresh manure should be avoided since it usually holds grub worms). After cultivating the bed, scatter a good commercial fertilizer at the rate of 50 pounds to each bed (15 x 50 feet), raking it well into the surface soil.

Aberdeen. Midseason. Produces immense crops of large, bright red berries. Perfect for home gardens.

Blakemore. Very early. Mammoth berries, red clear through, rather tart, very firm, and most delicious. Early, solid and very productive; excellent for shipping.

Catskill. Midseason. A heavy yielder of excellent fruit. Widely adapted to soil and climate. Perhaps the best of the midseason berries; continuous bearing through a long season.

Chesapeake. Midseason to late. The berries are uniform in size and shape, mostly heart-shaped, bright crimson, and the flesh firm and of excellent quality. Still a favorite with all professional gardeners.

Dorsett. Early. Largest in size, most attractive in appearance, heaviest in yield. Berries are bright red, shapely and of excellent flavor. Especially recommended for New Jersey and Hudson River Valley, New York. Vigorous and productive.

Fairfax. Ripening just after Dorsett, this remarkable berry rules the second-early market as decisively as Dorsett rules the early sorts. This is a "must" among Strawberries. One of the best.

Joe (Big Joe). A midseason to late variety, fully up to Chesapeake in size. Of very easy culture.

Marshall. Midseason. Vigorous in growth, with clean, healthy foliage. Very productive under high culture. One of the tastiest.

Premier. Excelled by no early variety. Produces vast quantities of berries of good size; attractive, and excellent quality. Very hardy. Easy to grow. Carries over the most severe winters. The best variety for preserving. Practically frost proof.

Redstar. Very late. The berries are large, glossy, bright red and do not turn dark. Considered more productive and a better quality than other late varieties.

Royal Sovereign. Well-known English variety. Produces large, well-shaped berries abundantly. Delicious flavor. Excellent for glass culture.
